MALYKKE™

– New time saving grinder with counters

MALYKKE™ is a brand new intelligent multi-functional grinder with built-in counters produced in Denmark. It is specifically suited to cafetière coffee and sale of coffee in bags. Can be used for grinding all types of coffee and espresso.

Time saving and very easy to operate. Consistent dosage each time. Just hook on the cafetière or the bag holder and the grinder takes care of the rest without the need to press any buttons.

The conical burrs ensure optimal and quiet grinding from the airtight chamber directly into the cafetière, bag or other receptacle. Grinds in a few seconds the precise amount of coffee and thereby frees up time for other tasks.

Operating error not possible. No waste and no loss

The grinder recognises each size of cafetière and bag and grinds the programmed dose consistently each time at the same time as it counts each grind on 4 levels:

1. Waiter, 2. Manager, 3. Burrs and 4. Total.

This way complete control over the period's consumption and turnover is achieved for each individual unit. Individual codes facilitates resetting of counter 1 and 2.

Simple user menu, which defines everything from motor speed, dosage, calibration, codes, language, locking of bean container, coffee type, light on/off/fade and much more.

Can be connected to cash register through add-on software.

Produced from glass blasted and anodised aluminium, which provides a durable and cleaning friendly surface.

Option: Multiple colours and nuances.

100% Danish produced & Danish design. Internationally patented and design protected.

Easy to operate

Simple user-defined menu, which contains codes, dosage, calibration, language choice, motor speed and more.

Code:	000
Welcome manager	
Manager menu (4)	
Dose	
3-CUPS	78
8-CUPS	11
Bag 1	39
Bag 2	24

Bean container

The lid is attached. A security against foreign elements in the container and unwanted access to the beans. Beans are refilled from the bottom, by taking the container off and turning it over, which allows the shutters to be opened.

Accessories

Extra or larger bean container for either 2 or 3 kilo. Waste tray, – easy to empty. Bag holder for sale of freshly ground coffee to take home.

Bag holder

Bag holder for sale of coffee to take home. Programmed individually for 2 different sizes of bags e.g. 100 gram and 250 gram, or according to own requirements.
