

*Serious Tools For Professional Baristas,  
HANDMADE IN FLORENCE*

January 24th, 2006- Circular Letter to the Worldwide Family of Distributors  
Ref. GB/5 Password Set-up

Dear La Marzocco Family Member,

For further clarification please find here enclosed proper instruction to enter in the different level setting within the GB/5 (and soon FB/80) software program:

- **BARISTA MENU** : Free access
- **ROASTER MENU** : push n.5 times the first button of the left button box
- **TECHNICIAN MENU** : push n.5 times the second button of the left button box
- **FACTORY MENU** : push n.5 times the third button of the left button box

Please consider that roaster and the technician passwords can be changed while the factory password cannot be changed.

Factory password recovers great importance mainly in the # of groups configurations, operations you have to put in place when you change some electronic spare part.

**PLEASE MAKE PASSWORDS AVAILABLE ONLY TO CHIEF TECHNICIANS AND NOT DISTRIBUTE TO BARISTAS AND CUSTOMERS. LA MARZOCCO IS NOT RESPONSIBLE FOR ANY FAULTINESS DUE TO AN IMPROPER SETTING OF THE EQUIPMENT.**

Finally we want to take the opportunity to remind you that within January 27<sup>th</sup> we are waiting to receiving all proper information regarding your Trade Shows activity in your respective markets. Those of you who still are pending to send out these info to us are kindly requested to make it. Thank you

Sincerely yours,

Roberto Bianchi  
Plant manager
