New diffuser and gasket Linea Mini (2024)

Month Day, Year

Dear Friends,

We are pleased to announce two production changes for Linea Mini (2024).

To reduce residual pressure in the portafilter after extraction we modified the groove in the diffuser (A.5.039.01) and added a gasket (H.3.020).

The new gasket will prevent residual pressure from remaining in the portafilter at the end of the extraction.

In production on machines from serial number:

MI016608
