THE VULCANO LINE

bringing together distinct
la marzocco design with
mazzer grinding expertise

burrs: **63mm, conical**
hopper capacity: **3lb**
grind speed*: **6.5 sec**
* approx. time per 18g dose

The Vulcano grinder line is inspired by the award-winning 1960s model grinder designed by La Marzocco co-founder Giuseppe Bambi, and features a Mazzer conical burr set. Vulcano Swift features La Marzocco Swift grinder technology to grind, dose, and tamp, providing repeatability and consistency of dose to within a fraction of a gram.

LA MARZOCCO & MAZZER PARTNERSHIP

Rarely do you see a La Marzocco espresso machine on bar without Mazzer grinders. La Marzocco and Mazzer are both companies that have come to stand for highest-quality and performance coffee equipment. The Swift system, applied in the Vulcano Swift, and paired with a Mazzer 63mm conical burr set, is barista friendly, removing steps in the espresso-making process that introduce variability.

HISTORY

In 2008, La Marzocco relocated from its original factory outside Florence to a more spacious campus. During the move, the engineering team came across extensive original drawings by Giuseppe Bambi, one of the founding brothers of La Marzocco – including the *Vulcano* grinder, which won a design award at the 1968 Milan Expo. Inspired, La Marzocco went to Mazzer and proposed developing a next generation Vulcano featuring Mazzer grinder technology.
