

la marzocco technical bulletin #156

New Diffuser Screw

June 26, 2019

The L106/V has been modified and is now available as A.5.110. The holes have been modified to allow for a more efficient steam flush on machines equipped with the steam flush feature. The A.5.110 can be retrofitted on all machines that currently use the L106/V.

This new diffuser screw was introduced with the KB90 and will be rolled out to all machines over time. Note: the KB90 should only use the A.5.110 as all KB90's have the steam flush feature.

Over time the L106/V will be phased out and only the A.5.110 will be available.
