

MODBAR TECHNICAL BULLETIN #37

new drip trays

Dear Modbar family member,

We are happy to inform you that we are introducing two new drip trays for our Modbar lineup. These are an added feature to the two existing ones (cod.987 for the Modbar AV and cod.1100 for the Steam) and come as an option.

Small drip tray: Measures 30x18 cm and features a “modbar” logo visible on the lower tray, as well as a central integrated pitcher rinser. Available as a spare part with code **C.1.572.R**.

Large drip tray: Measures 80x18 cm and is designed to serve 2-3 taps. It doesn't feature the "modbar" logo because it can be turned around to accommodate the pitcher rinser on the far right or left, according to your choice. Available as a spare part with code **C.1.573.R**.

Both trays come with the following kit: drain tube, hose clamp, 3/8" flexible hose, Y fitting, 3/8" fitting. You can now have more options to tailor your bar and to be creative with your counter setup!

Please do not hesitate to contact our solutions team with any questions you may have about this technical bulletin.
