

MODBAR TECHNICAL BULLETIN #43

New solenoid valve for Modbar Steam

Dear Modbar family member,

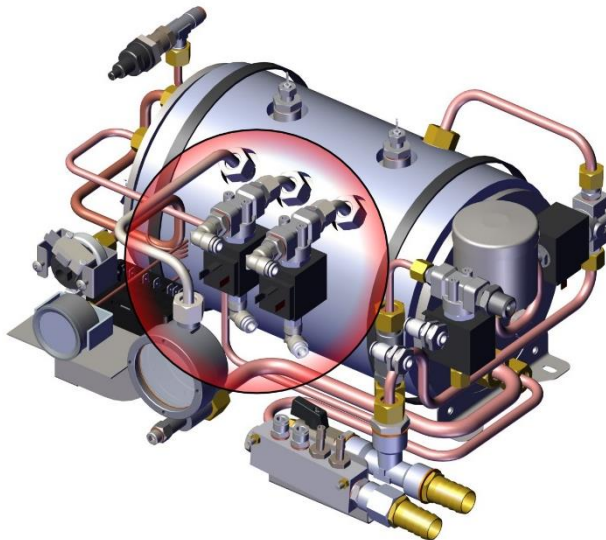

We are very pleased to introduce a **new steam activation solenoid valve assembly**.

The new valve has been fully re-engineered and presents multiple improvements, including a full AISI 316L steel body, an upgraded plunger seat, and 4.5mm steam passage hole. Overall, the performance and stress resistance have now been significantly enhanced.

All machines starting from Serial Number **MB007340** now feature the new valves.

The new valve assembly is available as part number **B.3.008**. The old valve assembly, B.2.030.01, is no longer available.

Do not hesitate to contact our solutions team with any questions you may have about this technical bulletin.
