SA584 – WATER SENSOR

January 15, 2025

Dear Friends,

A newly revised water sensor is now in production machines GB5 S, KB/90, Strada S, Strada X, and Strada 1X.

The water sensor connection points have been redesigned for durability and functionality; and the redesigned body is now solid black plastic, making it easily distinguishable from the previous translucent version.

Solid black plastic body

Clear cover on back

Technicians and installers - please note we are no longer advising removal of the water sensor.

Do not hesitate to contact our solutions team with any questions you may have about this technical bulletin.
