

MODBAR TECHNICAL BULLETIN #53

Tea portafilters

Dear Modbar family member,

In addition to the latest **firmware release (v 1.5.0)** for Modbar AV, which features new tea brewing functions (see **Tech Bulletin #52**), we are also introducing dedicated **tea portafilters**.

FEATURES

- Integrated **expansion valve** to adjust flow rate and pressure ramp-up during extraction. This ensures **even infusion** and prevents over-extraction point.
- A **spring-loaded** mechanism that calibrates when the expansion valve opens.
- **Screen insert** to retain fine particles.
- **Handle options** in line with the Modbar lineup: walnut, maple, or rubber.
- Compatible with the Modbar AV when used with firmware v1.5.0.
- Easy to disassemble for regular **cleaning and maintenance**.

Part Numbers

A.5.214.WW – Tea portafilter, **WALNUT** handle

A.5.214.MW – Tea portafilter, **MAPLE** handle

A.5.214.R – Tea portafilter, **RUBBER** handle
